

How do I improve my grade?

(Read the entire paper carefully)

There is no graded assignment for the 4th marking period. However, you still have a chance to improve your final grade by keeping up with the *weekly distance learning* in our [class webpage](#) and *making up your missing assignments from the previous three quarters*.

What assignments am I missing?

- Go to your gradebook from student/Parent VEU, find your missing or incomplete assignments for each quarter. (The title of each assignment tells you which ixl you need to work on)
- Compare those assignments with your ixl account and see what ixl assignments you are missing.

How often do I submit my progress on ixl?

- It is better to start with the first marking period assignments and work your way to the 3rd marking period. Once you completed the missing assignment for each marking period, email them to me. (please do not send each ixl assignments separately)

How do I submit my make-up assignments?

You have two options:

Option1: Complete the updated [ixl form](#) here and email it to me.

Option2: Email me the following information for each quarter:

1. First and last name, class period
2. Marking period: (1, 2, or 3)
3. SOL objective (You can find this information in the title of each assignment in the grade book)
4. IXL grade level (7, 8 or Algebra)
5. IXL name and score

You may copy and paste the above information into your email and then adjust the information.

Very Important Notes:

- I am not able to change the grades for these assignments in the grade book, so you cannot see any changes in your grade. However, I may change your final grade in the end of the year (sometimes around 6/12/20 based on the current schedule). By that time, I decide if, and what percentage your grade could be raised to. I will make my decisions based on your participation, following the instruction and completed assignments.
- Since I am giving you the chance to make up all your missing assignments for all three marking periods, it is **very important** that you follow the instruction in this paper carefully. **Incomplete** information in the form or your email may prevent you from receiving credit for your work.
- Please complete all the missing ixl related to each assignment in bundles (for example, if one assignment is Q.1,2,3,4 make sure you complete all of them before moving to the next and do not send an email for Q.1 and Q.2 and another email for Q.3 and Q.4. Sending this information separately may delay the processing time.
- Each assignment will be graded once. Make sure you are satisfied with your score and there is no missing ixl from each assignment before reporting them to me.
- There are 4 assignments in the first quarter without any ixl information in their title. You can make them up, improve or complete them by working on the following ixl assignments:

Objective 8.1: compare and order: 8th grade ixl D.8

Objective 8.1: Scientific notation: 8th grade ixl G.1 and G.2

Objective 8.2: Real number system 8th grade ixl A.9 and D.5

Objective 8.3: Square and square roots 8th grade ixl F.16 and F.17

Be safe and well!
